Report for 12/21/2024 - 12/27/2024

MARKET HIGHLIGHTS

This week in egg retail, the feature rate decreased 9.5% and the activity index decreased 33.6%. Large shell eggs continue to make up the bulk of offerings, primarily with a specialized environment claim. Activity remains mostly in the northeast, southeast, and midwest regions with very light activity in the south central, southwest, and northwest regions. Egg product features continue to be driven mostly by Egg Nog for the holiday season. Many of last week's ads were extended to run through Christmas or New Years.

Explanatory Notes:

FEATURE RATE: the amount of sampled stores advertising any reported item during the current week, expressed as a 'percentage of the total sample.

ACTIVITY INDEX: a measure of the absolute frequency of feature activity equal to the total number of stores for each advertised item (e.g., a retailer with 100 outlets featuring 3 items has an activity index of 300).

STORES/AVG: the number of advertising outlets and the weighted average price weighted by the respective number of outlets.
